PROFESSIONAL SUMMARY

- Frontend engineer with strong foundation skills in building MERN stack based web applications.
- Strong knowledge of HTML, CSS, JavaScript, React.js, Redux, and Node.js with Express.js to build responsive and interactive web applications.
- Skilled in using Redux JS Toolkit for state management and building dynamic, scalable, and maintainable UI components.

TECHNICAL SKILLS

- Languages: JavaScript
- Frontend Technologies: HTML5, CSS3, React, Redux
- Back-end Technologies: Node.js, Express.js
- Databases: Mongo DB
- Version Control : Git, GitHub
- IDE : Visual studio

EXPERIENCE

Software Engineer Intern | Fintek Point Software Solution Services, Cuddalore, July 2024 – Apr 2025.

EDUCATION

B.E. computer Science Engineering – IFET College of engineering, Villupuram (Anna University) | 2024

PROJECTS

Dynamic Role Based Routes Access Control

Developed a full-stack application with dynamic role-based routes access control using React.js, Redux for frontend and, Node.js for backend, and MongoDB for database. Implemented secure user authentication and dynamic role creations and route protection, enhancing application security.

E-Commerce website

I have developed Grocery Shop E-commerce website using React and Redux for frontend and Node.js for backend. The application includes features like cart management, and secure checkout using Stripe payment gateway integration. Through this project, I enhanced my skills in full-stack development, payment integration, and state management using Redux.
